### Company Detail

In 2014, HAF Equipment will be celebrating its 20<sup>th</sup> year in business. Originally started in the top of a retail store in a small Minnesota city.

Established in 1994 in Stillwater, MN. The company remains owned by its founder Peter Hoefler.

The company recently acquired and moved into their new headquarters located within 10 minutes of both Minneapolis and St Paul, MN. Sales, engineering, final assembly and product testing are run out of this Minnesota location. We have one international office located in Monterrey Mexico that provides sales and engineering.

HAF Equipment is committed to manufacturing and developing the world's most advanced dry powder process equipment and systems for the food, dairy and functional foods industries.

Our leading product line, Moovinator has proven very successful within process lines of all sizes. Moovinator is known by operators to be the absolute best filter receiver on the market—a machine that provides the safest and most ergonomic means of interfacing. Moovinator filter receiver are all tool free take apart and much more compact than its leading competitors products.

Navigator bulk bag unloader is the only all-electric non-hoist bulk bag unloader in the world. By eliminating a conventional hoist to lift and load bags, we have effectively eliminated a fugitive oil and debris source. Navigator uses electric drives outside of the loading zone to load bulk bags for unloading. Navigator is programmable and can be remote operated for additional safety. Full size bulk bags can be unloaded in heights of 13 feet.

Other leading products include our line of volumetric tube feeders, bag tipping stations, cart tipping/unloaders, tool free take apart butterfly valves, vacuum convey systems and complete process systems.

### Key Personnel

Peter Hoefler  
President

### Technologies and Products:

- Big and small bag handling/unloading
- Feeders
- Vacuum and pressure pneumatic convey systems
- Dust filtration
- Filter receivers
- Gravity divert valves
- Process bin activators
- Screw feeders
- Loss in weight batching systems
- Complete process systems

### Major Markets:

- Food Industry
- Breakfast cereal production
- Snack foods
- Yogurts
- Granola manufacturing
- Functional foods
- Dairy products
- Chemical production
- Co packers

### Countries with HAF installation base:

- USA
- Mexico
- Australia
- Philippines'
- China
- Canada

### Major Products:

- Navigator Bulk Bag Unloaders
- Moovinator Filters
- Complete systems

### Largest order (project) to date:

5+ million US complete process convey and batch system for large US multi national

### Partial Customer List:

- Nestle
- General Mills
- Mission Foods
- Henkel
- Malt O Meal
- 3M
- ConAgra
- Pepsi
- Frito Lay
- Yoplait
- Betty Crocker
- Agropur
- GEA
- Bosch
- Abvie
